

Flocculation Mixer

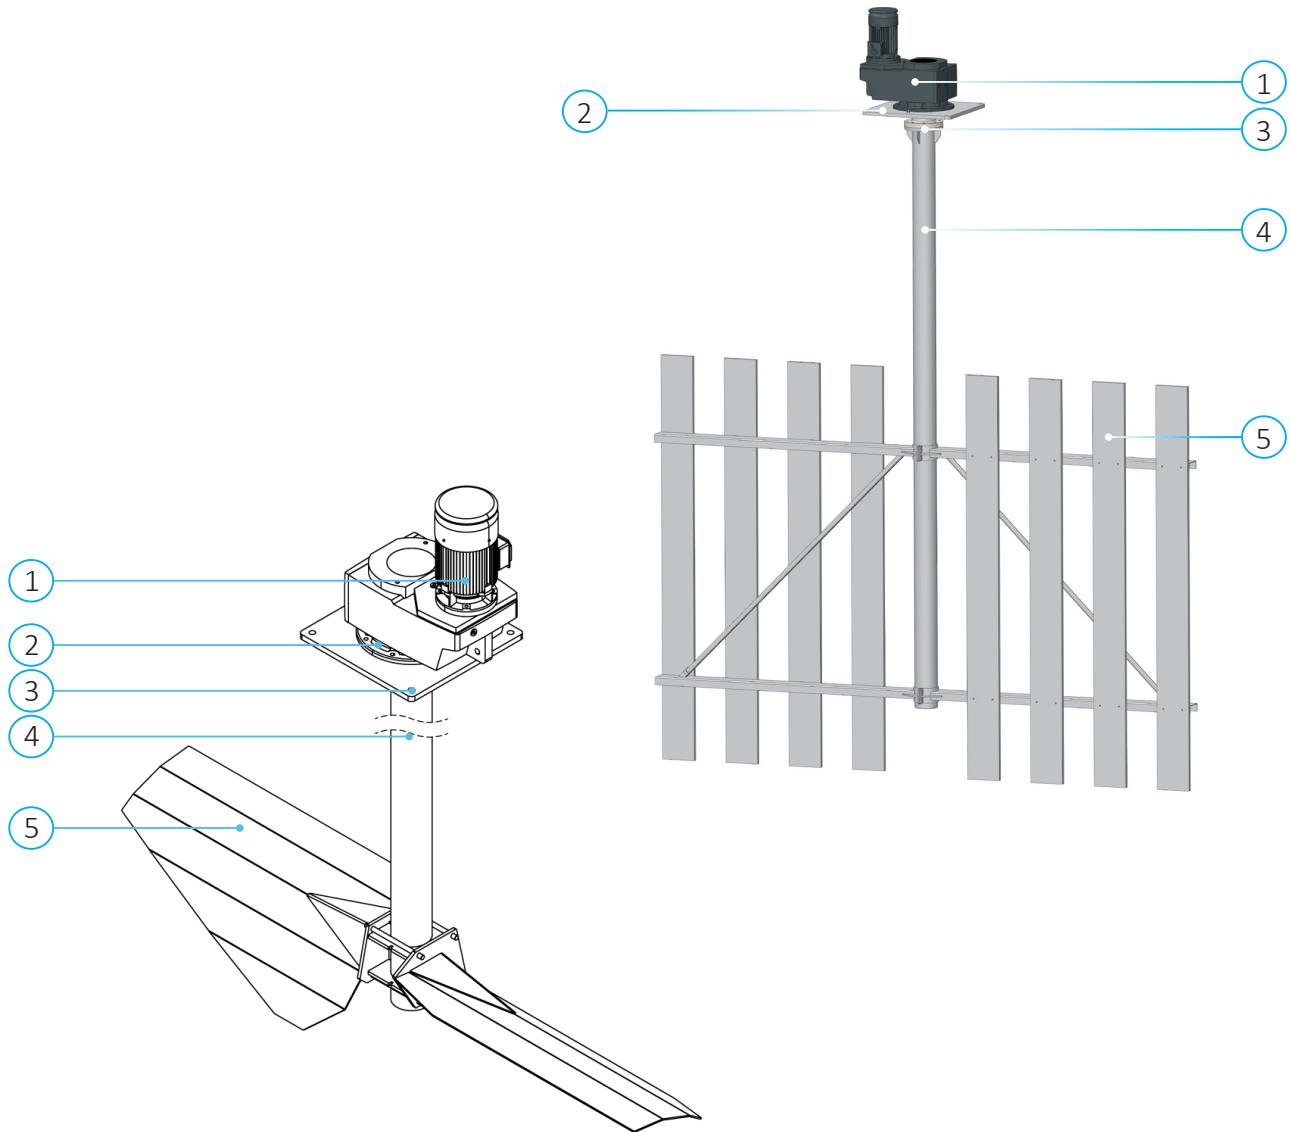

▷ Features & Applications

- ▷ Used to gently mix the chemically treated water, therefore enhance the settling process.
- ▷ Widely used in sedimentation tanks of wastewater treatment plants.
- ▷ Fully customizable according to customer needs.
- ▷ Required mixing provided with minimum energy consumption.
- ▷ Multiple horizontally installed flocculation mixers can be powered by a single drive unit.

Flocculation Mixer

	Components	Materials & Options
1	Drive Unit	Motor and Gearbox
2	Base Plate	Carbon Steel
3	Coupling	Carbon Steel / Flanged Rigid Coupling
4	Shaft	Stainless Steel Grades / Round or Square Tube Shaft
5	Impeller	Stainless Steel Grades / Paddles, Pitched, Flat or Hydrofoil
	Bolts&Nuts	A2/A4
